

AHMED BAHGAT

Digital Transformation & Enterprise Architecture Leader

Saudi Arabia | +966509576615 | aahmedbahgatt@gmail.com

PROFESSIONAL SUMMARY

An accomplished Transformation Architect with 20+ years of experience orchestrating large-scale digital and organizational transformations across the Telecom and Enterprise sectors. Expert in designing holistic transformation roadmaps that align business strategy with technology capabilities, having successfully led transformation initiatives exceeding \$60M in value. My unique combination of enterprise architecture expertise, business transformation acumen, and delivery excellence enables me to architect sustainable change that delivers measurable business outcomes. Proven track record of transforming complex legacy environments into modern, agile, and cost-effective operating models for premier organizations including STC, Du, Etisalat, and Ooredoo.

Key Strengths:

- Strategic transformation initiatives planning, value analysis, roadmapping and benefits realization management
- End-to-end transformation conceptualization and delivery - from strategy design to successful implementation
- Business value translation from technical transformation capabilities to measurable business outcomes
- Highly developed consultative approach, solution selling and business development skills
- Public speaking, verbal and written communication, presentation and negotiation
- Able to translate product knowledge into customers added business value

CORE COMPETENCIES

Strategic Advisory & Value Creation:

- C-Level Technology Advisory
- Investment Strategy & Business Cases
- Market and Vendor Analysis
- Risk Assessment & Mitigation
- Performance Optimization & Cost Reduction

Strategy And Architecture:

- Enterprise Transformation Strategy
- Business Process Reengineering
- Technology Roadmap Design
- Digital Operating Model Design

Transformation Leadership & Governance:

- Change Management
- Transformation Program Management
- Benefits Realization Management
- Organizational Design & Capability Development

Solution Design & Innovation:

- Technical Solution Architecture
- Technology Portfolio Optimization
- Observability and Service Management Solutions
- Data & Analytics Architecture

KEY TRANSFORMATION ACHIEVEMENTS

At Saudi Telecom Company (STC) - 2015-2025

Digital Transformation Leadership

Managed RFPs for IT Operations Management and Service Assurance, delivering value business cases covering gap analysis, technology benchmarking, TCO, ROI, Future Mode of Operation and benefit realization planning for key transformation initiatives:

- End-End Service Monitoring Solution (Smart Monitoring project) using Opentext ITOM suite of solutions with budget of 8M SAR
- Consolidation of 5+ monitoring tools under EMC SAS unified monitoring, delivering operational efficiency improvements and achieving 20M SAR in cost savings.
- Remedy ITSM (IT and Network) consolidation project encompassing a one year consulting project as a preparation for legacy processes migration to consolidated new structure.
- BMC Remedy (IT) upgrade project and setup of cross functional Service Management Office organization (Technology, Process and People)
- Business order monitoring AiOPs solution resulted in reduction of critical incident Mean Time to Resolution (MTR) by 60%
- Technical Delivery for enterprise SIEM solution based on Microfocus/Opentext Archsight solution to monitoring 25,000 security assets
- Conducted analysis, benchmarking and top management briefing for related technologies: ServiceNow, BMC Remedy, UiPath (RPA), Splunk ITOM, BMC Helix, Dynatrace/ Appdynamics /IBM instana (APM solutions), Opentext ITOM on cloud and others

Cost Optimization & Efficiency Impact

- Achieved 15% year-over-year reduction in software licensing through IT Asset Governance program
- Implemented Service Management Office in collaboration with BMC resulting in 40% improvement in successful changes in infrastructure layer
- Provided executive-level consulting and governance for major transformation engagements with BCG, KPMG, and Accenture focused on core business journey digitization
- Technical SPOC for dev-sec-ops deployment delivering unified model across cybersecurity, applications and applications technology units
- Built new capability for RPA automation across the business unit significantly reducing execution time by 55% for selected processes (HR, Finance and Operations)
- Managed the IT Asset and Monitoring operating model engagement by KPMG, delivering strategically aligned, organization model for IT Monitoring and Asset Management
