- Developing Enterprise Architecture Processes, IT Operating Models, Organization Design & IT Governance Processes.
- Enterprise Architecture Initiatives: Business/IT alignment, Application Portfolio Management, IT Cost optimization (Opex/Capex)
- End – End architecture for: Network Operations and Security Operations Center processes and frameworks, Telecom OSS Assurance and OSS Fulfilment Solutions, Customer Experience Management and Analytics, IT Service Management, IT Asset Management, IT Capacity Management solutions, SIEM Security solutions, Public and enterprise Cloud infrastructure.
- Architecture knowledge of Big Data, Blockchain, Smart contracts, Machine Learning and Industry 4.0 solutions.
- Worked as end-end architect on mega scale digital projects to deploy service and asset management solutions, process improvements, organization design, telecom projects including OSS assurance and fulfillment and security solutions

Professional Experience

Saudi Telecom (STC), Saudi Arabia

Service Management Design Advisor

June 2015 – Present

- Manage enterprise and solution architecture for all STC Asset Life Cycle solutions (ITSM platforms, Enterprise Monitoring, Asset and Capacity Management solutions).
- Manage EA governance to ensure compliance and alignment of all underlying solution architectures.
- Development of the EA standards, policies and guidelines for enterprise monitoring solutions.
- Evaluating new technologies with TCO /ROI impact to business. Developing and evaluating RFPs and conducting vendor selection process.
- Working closely with digital transformation initiatives cross STC IoT, Private and Public Cloud, CEM, BI and Analytics, Robotic Process Automation, Cloud (Private and Public) and technology owners to transform the asset life cycle journey.
- Articulate and Supervise quality, benefits and end value of major initiatives/ programs.
- Led following initiatives / programs:
 - Consolidation program for enterprise monitoring solutions with opex and capex saving of 30M SAR.
 - Consolidation for ITSM platforms in network and IT leading to savings in opex capex by 40% and increase in service excellence
 - Cyber Security SIEM expansion project (Arcsight, Splunk) to expand over STC group.
- Managed following IT process improvement and governance programs:
 - Digital asset management operating model transformation resulting in greater efficiency in measuring asset operational and financial utilization.
 - Digital Asset operating model, processes and governance framework resulting in opex and capex savings of 5 million SAR.
 - Robotic process automation (RPA) operating model, and related organization change management resulting in savings expected of 35 - 45% of total FTEs / process and increased efficiencies.
 - Development internal department operating model and governance framework to govern asset life cycle.
 - Conducted several audits on governance and portfolio, architecture processes using COBIT 5 and IT4IT and SIAM assessment.
 - Developed BSC process to measure initiatives performance: strategy maps, KPI trees and balanced scorecards.

Fingerprint Consultancy, Saudi Arabia

Principal Consultant

Jan 2014 – Jan 2015
